BAROQUE LIST

Revised: June, 2008

This list contains selections by level for the annual Baroque Festival. Please refer to the **Rules and Regulations** document (available on the web site) for specific information regarding this festival.

Each selection has been assigned a number and a primary source to aid in the identification of the selection. Additional sources for each selection are contained in the appendix which includes several popular and often used collections. The selections are also identified by number in the appendix. Baroque selections start with B.

You are free to use any source you wish whether it is a primary source, in the appendix, or a source that you have that is not included in this document.

When using a source other than those listed be sure that it is the exact piece and/or movement that is identified on this list.

Please note that pieces such as Bach's Inventions, French Suites, and Well-Tempered Clavier Preludes and Fugues do not have a primary source listed.

This list is in force for the 2008 Baroque Festival, however, for 2008 **ONLY** you may use either the old list or the new one.
